

CUPRUM COIN

The Nano Commodity of the Future

ONE PAGER

What is Cuprum Coin?

It's a commodity token, ticker CUC, backed by underlying assets in the form of unique ultrahigh purity nano copper powder.

Purity: 99,9982% & 99,9983%

Size: 5,1 Nm, 9,0 Nm, 21,0 Nm

Who is behind the project?

Meteor Minerals Group, i.e. 4 companies registered in UAE, Chile, US & UK. The group has its own production of underlying assets.

Who is the team?

Brokers, commodity traders, analysts, technology experts, professors, nano scientists, lawyers, marketing experts, with many years of professional experience in these fields.

What is the underlying asset used for in that form?

It is used primarily in medicine for the diagnosis and treatment of cancer, and is used in the aerospace industry to produce Cu-W & Cu-D alloys for advanced rocket engines.

Due to its very high value, it is also used as a financial product as collateral, while certain banks buy it and store it in their vaults.

How many members does the Cuprum Coin community have?

There are over 15,000 registered members in the system.
